Priority :

- Finding and reporting bugs
- Improving ⬆ UI/UX

Reporting error

Make a bug/error tracking file with page information/name, data you error⚠ with, screenshot and console error message.

Running Project :

Get scripts after clone

```
 npm install react-scripts --save
```

Available Scripts

In the project directory, you can run:

```
npm start
```

Runs the app in the development mode.
Open http://localhost:3000 to view it in your browser.

Authentication :

- Get emails from respective(Student, Faculty,) database

- ⚠singingup new user, make sure not to signup not existing user (*I will fix this later *)

Firebase:

```
    Firebase console access give to your mails in Gmail spaces CES
```

- Check current mail if any issue with firebase console
